

Fuel research and development
for the 21st Century

Call for Papers

Symposium on Greenhouse Gas Emissions: Control, Conversion and Utilization for Fuels and Energy Production

242nd ACS National Meeting & Exposition
Aug. 28-Sept. 1, 2011, Denver, Colorado, USA

Division of Fuel Chemistry, American Chemical Society

An international forum for scientists and engineers to present their latest findings and innovations for the greenhouse gas control, conversion and utilization. Topics may include, but are not limited, processes and materials for greenhouse gas capture, separation, conversion, and utilization:

- **Processes:** catalytic, electrochemical, biochemical, and photochemical processes, adsorption and absorption processes, membrane process, and supercritical extraction process.
- **Advanced materials** include organic, inorganic and metal organic adsorbents, catalysts, membranes, nanometerterials, and other novel materials.

Organizers

Prof. Yun Hang Hu

Department of Materials Science
and Engineering Michigan
Technological University
Houghton, MI 49931 USA,
Phone: 906-4872261; Email:
yunhangh@mut.edu

Dr. Praveen K. Thallapally

Energy and Environment Directorate;
Pacific Northwest National Laboratory,
902 Battelle Boulevard, P.O. Box 999,
MSIN K6-81, Richland, WA 99352
USA. Phone: 509-371-7183; Email:
Praveen.Thallapally@pnl.gov

Prof. Honglai Liu

Department of Chemistry,
East China University of
Science and Technology 130
Meilong Road Shanghai
200237, China, E-mail:
hliu@ecust.edu.cn

April 11, 2011 is the Due date for online submission of abstracts and
2-page Preprints @ <http://abstracts.acs.org>
